## COMMITMENT TO QUALITY

ERI-TECH is an ISO 9001 Certified company. Our quality control wing is alive to the need of exacting and precise standards to ensure a high level of quality assurance.

## TESTING TO STANDARDS

We use laboratory span of 40 meters to erect ADSS to the required tension and carry out tests in conformity to international practices and as per IEEE 1222. These tests include Optical tests, Aeolian vibration tests, Fatigue tests, Electrical and Mechanical tests and will measure degradations on the system under fatigue performance.

## Fulfilling Customer's Comfort With training to their Manpower by

- Display and Training on Scaled down Prototype Network Demonstration Models
- Classroom Training with Faculty lectures, Splicing and OTDR procedures and Library supports
- This training programme will ensure trainees to
  - Achieve a reliable output
  - A uniformity in installation
  - Achieve defined construction practices
  - Standardisation on system configurations
  - Use required safety procedures during Erection and Installation
  - Understand project management practices
- Building their confidence levels with hands-on training programme
